

True Logik GmbH Service partner of the Munich Trade Fair
 Rigging, lighting, sound, video projection and event management.

Information / Munich Trade Fair / Suspension points plan

PLEASE READ THIS CAREFULLY

In order to plan your points we need the following information. The omission of any one of these requirements will result in delays.

ORIENTATION : Please show as much information as possible, neighboring stands, aisles, and indication of North.

MEASUREMENTS & SCALE : Measurements should start from one place, in this case the lower left corner. We have used a scale of 1:100mm

POINT HEIGHT : The height of your points must be clearly marked. If you feel you may need to adjust the height on site, we recommend you order a `drop` The `drop` makes the vertical adjustment easier. If using hoists you also need to order a `drop` Usually 1.5m See lifting with hoists (pdf) in DOWNLOADS
